

Left and below—Penlux Masterpiece Grande fountain pens in Blue Comet and Blue Planet. Far left—Masterpiece Grande fountain pen in Galaxy Black. Below—Penlux MO tangerine and plum 50-ml ink bottles and box packaging.

The Penlux Metallic has a sleek contemporary design with a piston filler and stainless steel Schmidt nib. This pen offers a clean, minimal profile. The consistent silver color is a delight for the eye, and its compact yet solid feel is reliable in the hand.

Masterpiece Grande, the flagship, is a large fountain pen but remarkably light in the hand, a piston-filler with a rhodium- or gold-plated roller clip and cap ring, highlighted by a wonderfully smooth JoWo nib in stainless steel or 14 karat gold. It comes in three colors: Galaxy Black (solid matte black), Blue Comet (solid matte dark blue), and Blue Planet (swirled shades of blue).

The Great Natural collection is a variant on the Masterpiece Grande base. Inspired by nature, these pens—some in limited editions—are identical in profile to the Masterpiece Grande but use semi-transparent PMMA resin. Four different editions are currently available. Deepsea is semi-translucent blue with gold-plated trim and a 14 karat yellow gold nib, while Rainforest is semi-translucent green with rhodium-plated accents and a 14 karat white gold nib. Cloudybay is semi translucent colorless PMMA with gold-plated trim and a 14 karat gold flexible nib (other nib grades are also available), limited to 388 pieces. Blue Lake is clear, colorless translucent PMMA with rhodium-plated trim and a matching 14 karat gold flex nib (also available with other nib grades, limited to 388 pieces).
